

Coming soon to your neighborhood!

Dear Nessel Township Neighbor:

CenturyLink is making exciting network upgrades in your community! CenturyLink, the State of Minnesota (Border to Border Broadband Development Grant Program) and the Township, working together, will bring fiber optic cable to the doorstep of homes and businesses to meet the need for high-speed internet access and to satisfy the state's goal of border-to-border broadband service availability.

You may see us working in your neighborhood and near your home as we locate existing cables and replace them with new, high-capacity fiber. This work may include burying new fiber, working in public roads, and accessing public utility easements.

"The internet plays a big role in daily life, powering homes, businesses, education, health care and entertainment," said, Stephen Whiteing, CenturyLink vice president, consumer sales. "CenturyLink Fiber Gigabit can provide the capacity customers need, connecting people to work from home, attend classes online and more. Nessel Township residents need the fiber technology to efficiently support all these connections and be ready for what lies ahead, and CenturyLink is here to provide a fast, reliable connection with fair pricing and no contracts."

Later in the year or early next year, we expect to be ready to offer improved internet service at your address and will communicate with you again as the upgrade options become available. If you decide to order CenturyLink Fiber Internet to your home, then a "drop" fiber cable will need to be placed, typically buried along your driveway, to deliver fiber-based high-speed internet service. Any one-time costs associated with placement of the fiber drop will be waived-if you place your order before May 31, 2022. Beginning June 1, 2022, a one-time charge associated with drop placement might apply.

CenturyLink® Fiber Internet delivers enough power to stream, binge, work and play with plenty of speed for what comes next. CenturyLink Fiber Internet – wait less do more, stream HD and 4K content from every device and game with virtually no lag. This is the full potential of the internet – for every device, every room and every person. To learn more about **CenturyLink Fiber Internet** and to check availability, visit www.centurylink.com. We look forward to sharing more information about the fiber construction in the coming weeks.

Sincerely,

The Minnesota CenturyLink Team

Fiber Gigabit: Maximum download/upload speed of up to 940 Mbps via a wired connection.

CenturyLink services are not available everywhere. Residential customers only. CenturyLink may change, cancel, or substitute offers and services, or vary them by service area, at its sole discretion without notice. All products and services listed are governed by tariffs, terms of service, or terms and conditions posted at centurylink.com/terms. Customer speed experiences will vary, particularly when accessing the Internet wirelessly from various devices. Download speeds are via a wired connection. Internet speeds vary due to conditions outside of network control, including customer location, equipment, and access through a wireless connection, and are not guaranteed. See centurylink.com/InternetPolicy for additional network performance information. Additional restrictions apply.
